## DETAILED ACTION

This action is responsive to applicants' claims filed July 15, 2003 and three Information Disclosure Statements filed in this application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al (US Patent 4,799,484). The patent to Smith et al discloses a surgical needle having a linear body including a proximal, central and distal end, the distal end having a parabolic profile. The needle has the same structural limitations recited by applicants' therefore it inherently has a uniform stress profile. There are no structural features that distinguish Smith et al from claims 1 and 10.

### ***Allowable Subject Matter***

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-9 are allowable over the art of record.
